

Fast Facts on Kidney Disease

- Over 40 Australians die of kidney failure each day.
- You can lose up to 90% of your kidney function before you start feeling sick, and by then it's too late.
- 1 in 3 Australians is at increased risk of developing kidney disease.
- 11.3% of all deaths are due to, or associated with, kidney disease.
- Approximately two million Australians may be affected by early stage kidney disease and don't even know it.

BIG RED BBQ
